

## Job Safety Analysis (JSA) Number 1: To be used for Risk Assessment Review

JOB SAFETY ANALYSIS				JSÆ	4 No. 001	NEW		DATI	<u>E:</u>	
				PA	AGE 1 OF 2 <u>REVISED</u>			DATE:		
JOB (TASK) TITLE:	Changing a tyre on a work vehicle					REVISION NUMBER:				
	TITLE OF PERSON PERFORMS JOB: Driver	WHO	IO SUPERVISOR:			ANALYSED BY: Safety Advisor				
COMPANY: BIG MINE PTY LTD	DEPARTMENT: SAFETY		PLANT/ On road	<mark>/LOC</mark> d sid	ATION: e	REVIEWED BY:				
	REQUIRED OR RECO EQUIPMENT:	<mark>DMMEN</mark>	DED PER	<mark>SON</mark>	NAL PROTECTIVE APPROV		) BY:			
SEQUENCE OF BASIC JOB STEPS	Gloves POTENTIAL HAZARDS	ASS PROB (	RISK ESSMENT	<b>F</b> ORE	RECOMMENDED ACTION OR PROCEDURE		R	<b>RESIDUAL RISK</b> PROB CONSQ SCORE		SCORE
1. Park vehicle & secure	- Vehicle could roll and cause damage of injury Pedestrians could be hit by passing vehicles while changing the wheel	3	4	18	<ul> <li>-Park on a level surface, clear of traffic.</li> <li>-Apply the handbrake.</li> <li>-Turn on the hazard lights.</li> <li>-Gearstick in reverse(manual) or park (automatic).</li> <li>-Remove key from ignition.</li> <li>-Passengers removed from vehicle.</li> <li>-Place lustre cones (witches hats) on road.</li> <li>-Chock the wheel that is diagonally opposite the flat tyre to prevent movemnet.</li> <li>-Refer to vehicle manual (glove box) for instructions if required.</li> </ul>		fic. S	3	4	5
2. Remove the spare wheel and jack from their storage positions in the vehicle	-Over exertion	3	4 :	18	-Stand the spare tyre up and roll it out of the vehicle if possbile. -Place the spare type under vehicle near the flat tyre.		ut 2	2	2	5
3.Loosen wheel nuts	-Over exertion -Hand injury if the wheel brace slips. -Vehicle could fall if wheel nuts are removed.	1	1	1	-Loosen but do not remove wheel nuts. -Turn the wheel brace anti-clockwise.		2.	1	1	1
4.Jack up the vehicle	Vehicle could fall off jack and cause injury or damage	2	3	9	-Place the jack at th point -Raise the vehicle un sitting just off the g	e designated lifti ntil the wheel is round	ng 2	2	3	9
5.Swap the wheels	-Over exertion -Hand injury	2	3	9	-Remove the wheel them together on a -Remove the wheel spare -Place the flat tyre u -Lightly tighten te w wheel brace in the sequence as per the	nuts and place clean dry locatio and replace it wi under the vehicle /heel nuts with th designated e vehicle manual	in ith : ne	2	3	9

### JSA for Review | Certificate IV in WHS BSB41419 | BSBWHS414 Contribute to WHS Risk Management

6.Lower the vehicle		-Lower the vehicle completely and remove the jack	
7.Tighten the wheel nuts	-Over exertion -Hand injury if wheel brace slips	-Tighten the wheel nuts fully in the designated sequence as per the vehicle manual	-Use correct manual handling techniques -Ensure wheel brace is on the nut properly -Wear gloves
8.Stow the jack and the flat tyre	-Over exertion	-Remove the wheel chocks Place tools and flat tyre back to correct storage area	-Use the correct manual handling technique

Rare	(1)	(3)	(6)	(10)	(15)		

# Risk Matrix / Generic Hazard List / Consequence & Likelihood Levels

#### A. GENERIC ENERGY HAZARD LIST

Generic Energy Hazard	Definition
Biological	Potential for positive or negative impacts resulting from the interaction of activities with biological agents. This could be harm by exposure to biological hazards, flora and fauna including insect stings, bites, bacteria and other disease agents, viruses and natural poisons or environmental harm to biodiversity.
Chemical	Potential for harm by chemicals include acids, alkalis, organic substance (e.g. gases, fuels, lubes, degreasers, solvents, paints) ozone-depleting substances etc.
Climate / Natural Events	Potential for harm by exposure to extreme natural, environmental or climate sources and events (including lightning, high winds flooding).
Dust / Inhalable Particulates	Potential for harm by exposure to fine dry particles of matter in the air. Dusts, mists, vapours and aerosols (Coal dust, silica dust, environmental nuisance/community complaints).
Electrical	Potential for harm to people, equipment/assets or the environment by exposure to electrical sources.
Ergonomics	Potential for exposure to physical actions or forces, including poor design, thus presenting the potential for harm associated with exertion, excessive, unnatural or repetitive movement, poor posture or other undesired physical stress on the human body.
Explosives	Potential for harm by exposure to explosive material (e.g. unexploded detonators, tie-down lines, etc.).
External Threats	Potential for harm resulting from an external event outside of the operations direct control (e.g. legislation, government actions, community lobby groups, etc.).
Fire	Potential for harm by exposure to a burning mass of material (e.g. building fires, spontaneous combustion).
Gravitational (Objects)	Potential for harm by exposure to falling objects, unexpected movement (ground, slope, structure) due to uncontrolled gravitational forces.
Gravitational (People)	Potential for harm to people caused by their being subject to falling, unexpected movement or in any other way resulting from their being exposed to uncontrolled gravitational forces (including slips, trips, and falls).

Land	Potential harm to the naturally occurring environment due to the use or management of land resulting from pollution, clearance or any other degradation.
Lighting	Potential for harm resulting from excessive light or inadequate lighting in the workplace.
Mechanical (Fixed)	Potential for harm by exposure to interaction with sources of fixed mechanical energy (including those powered by electrical, hydraulic, pneumatic, combustion, etc.).
Mechanical (Mobile)	Potential for harm by exposure to interaction with sources of mobile (self-propelled) mechanical energy (including those powered by electrical, hydraulic, pneumatic, combustion, etc.).
Magnetic	Potential for harm to people, equipment/assets or the environment by exposure to magnetic sources (including handling metal objects in strong magnetic fields).
Noise	Potential for harm by exposure to sudden or prolonged exposure to excessive noise or community complaints.
Personal / Behaviour	Potential for harm associated with intentional undesired behavioural actions, stresses or stressors.
Pressure / Explosions	Potential for harm by exposure to sudden release of pressure from a specific source (including pressure waves from explosions, pressurised systems, cylinders, springs, chains, flying bits, or community complaints associated with air blast overpressure etc.).
Psychological	Potential for harm associated with stressors from situations, conditions or events that could create negative emotional, cognitive or behavioural outcomes.
Radiation	Potential for harm by exposure to radiation waves, whether natural or manufactured sources (characterised as either ionising or non-ionising sources).
Social / Cultural	Potential for positive or negative impacts resulting from the interaction of business activities with social or cultural expectations (includes social licences to operate).
Thermal	Potential for harm by exposure to or variations in temperature (hot or cold) but excludes anything that is on fire which has a separate category.
Vibration	Potential for harm resulting from prolonged exposures to excessive vibration or blast vibration.
Waste	Potential for harm caused by the inappropriate use of resources, inadequate management or disposal of waste material (including pollution and greenhouse gases).
Water	Potential for harm caused by the inappropriate use of water resources or inappropriate management or disposal of water.
Other	Potential for harm by exposure to other hazards/aspects, e.g. friction, bio-chemical.

# A. LIKELIHOOD LEVELS

Likelihood	Description Considering the present and magnitude of the hazard and the exposure to that hazard() Number of people and the frequency of the tasks exposing those pole and also the status of existing controls
5 (Almost Certain)	The unwanted event is almost certain to happen within the LOB (Life Of Business). In the case of repetitive/ frequent task, the unwanted event has or will occur in order of one or more time per year. In terms of major events, as also in the case of long term health, environmental or social impacts, it may happen only once in the LOB.
4 (Likely)	There is a high probability that the unwanted event is almost certain to happen within the LOB. In the case of repetitive/ frequent task, the unwanted event has occurred or is likely to occur in order of less than once per year. In terms of major events, as also in the case of long term health, environmental or social impacts, it may happen once in the LOB.
3 (Possible)	It is possible that the unwanted event can occur within the LOB. In the case of repetitive/ frequent task, the unwanted event has occurred or is likely to occur in order of 5-10 years. In terms of major events, as also in the case of long term health, environmental or social impacts, it may possibly happen once in the LOB.
2 (Unlikely)	There is a low probability that the unwanted event to occur within the LOB. In the case of repetitive/ frequent task, the unwanted event has occurred sometime or is likely to occur not more than 10-20 years. In terms of major events, as also in the case of long term health, environmental or social impacts, there is a low probability for the event to happen in the LOB.
1 (Rare)	There is a very low probability that the unwanted event to occur within the LOB. In the case of repetitive/ frequent tasks, there are no records of the event occurring, or it is highly unlikely that it will occur within the next 20 years. In terms of major events, as also in the case of long term health, environmental or social impacts, there is a very low probability for the event ever to happen.

## **B. CONSEQUENCE LEVELS**

Consequence Level - Consider the maximum reasonable potential consequence of the event							
Impact Type (Additional 'Impact Types' may exist for an event; identify & rate accordingly)	1 Minor	2 Low	3 Medium	4 High	5 Major		
(S) Harm to People - Safety	First aid.	Medical treatment.	Lost time.	Permanent disability or single fatality.	Numerous permanent disabilities or multiple fatalities.		
(H) Harm to People – Occupational Health	Exposure to health hazard resulting in temporary discomfort.	Exposure to health hazard resulting in temporary alterations/n limitations (no time lost).	Exposure to health hazards/agents (over the OEL) resulting in a reversible impact on health (with time lost).	Exposure to health hazards/agents (significantly over the OEL) resulting in an irreversible impact on health with loss of quality of life or single fatality.	Exposure to health hazards/agents (significantly over the OEL) resulting in irreversible impact on health with loss of quality of life of a numerous group/population or multiple fatalities.		

(E) Environmental Impact	Lasting days or less; limited to small area (metres) receptor of low significance/sen sitivity (industrial area).	Lasting weeks; reduced area (hundred of metres); no environmental ly sensitive species/habita t.	Lasting months; impact on extended area (kilometres) area with some environmental sensitivity (scarce/valuable environment).	Lasting years; impact on sub- basin; environmentally sensitive environment/re ceptor (endangered species/habitats ).	Permanent impact affects a whole basin or region; highly sensitive environment (endangered species, wetlands, protected habitats).
(C) Social / Community Impact	Minor disturbance of culture/social structures.	Some impacts on local populations, mostly repairable. Single stakeholder complaint in reporting period.	Ongoing social issues. Isolated complaints from community members/stakeh olders.	Significant social impacts. Organised community protests threatening continuity of operations.	Major widespread social impacts. Community reactions affecting business continuity. "Licence to operate" under jeopardy.
(L&R) Legal & Regulatory	Technical non- compliance; no warning received; no regulatory reporting required.	Breach of regulatory requirements; report/involve ment of authority. Attracts administrative fine.	Minor breach of law; report/investigati on by authority. Attracts compensation/ penalties/ enforcement action.	Breach of law; may attract criminal prosecution of Operating Co. and/or of Directors/Mana gers and penalties/ enforcement action. Individual licence temporarily revoked.	Significant of the law; may attract Individual or class action lawsuits, criminal prosecution of Co. Directors/Mana gers. Suits against parent Co.; permit to operate substantially modified or withdrawn.
(M) Material Losses/ Damage/ Business Interruption	< 0.01 % of Annual Revenue/ Total Assets.	0.01 – 0.1 % of Annual Revenue/ Total Assets.	0.1 – 1.0 % of Annual Revenue/ Total Assets.	1 - 5 % of Annual Revenue/ Total Assets.	> 5 % of Annual Revenue/ Total Assets.
(R) Impact on Reputation	Minor impact, awareness/ concern from specific individuals.	Limited impact; concern/ complaints from certain groups/ organisation (e.g. NGOs).	Local impact; public concern/ adverse publicity localised within neighbouring communities.	Suspected reputation damage; local/ regional public concern and reactions.	Noticeable reputation damage; national/ international public attention and repercussions.
